# Explanation of Need: Enrollment and Program

#### **Enrollment Finding:**

- Unmitigated school age population growth attributed to continued Bedford move-ins, and an additional 18 student minimum increase in Davis numbers attributed to housing developments not included in the Lane study. *The Space Needs Task Force Davis School Update*
- Average of 600 students at Davis through at least 2025

 Actual numbers exceed projections each year since 2013 (this year, Kindergarten enrolled 9 more students than expected, while 1<sup>st</sup> and 2<sup>nd</sup> dipped slightly due to families not finding housing in

Bedford

## Programmatic Needs

The educational program at Davis School has expanded during the past twenty years to include components that did not previously exist: e.g., in-house special education programs, English Language Learner programs, additional specialists, etc.

- Drop off and pick up constraints imposed by the present site configuration results in 20 minutes of lost learning time every day
- The cafeteria is overcrowded even with four lunches and entrance and egress are limited to the same door.
- Music has been displaced into an inadequately shaped, sized and acoustically unsound room
- The SAIL classroom is undersized
- Insufficient storage, conference and office space

# Resulting Davis School Space Needs

#### **Enrollment-driven Needs**

- 2 classrooms to replace modular
- 1 kindergarten class (10<sup>th</sup>)
- Prudent: 1 first grade, 1 second grade, 1 combined art/music classroom

#### **Program-driven Needs**

- Program Needs
- 1 Adequately sized, shaped and acoustically sound music room
- 1 Expanded SAIL classroomThe SAIL program needs an expanded space (internal)
- Expanded OT/PT space (SAIL and pre-school) (internal)
- Expaned cafeteria- present tight squeeze, four sittings, must use same door for entry and exit
- Reconfigured parking and bus/parent pick-up and drop-off- will gain 20 minutes of teaching and learning time per day- additional parking spaces as well
- Office, conference and storage space (internal and new)

#### DUE DILIGENCE

- Sought efficiencies by examining JGMS and BHS space needs
- Closely examined 15 options including drawings and cost estimates
- Compared costs and programmatic advantages associated with three individual projects vs. various combined projects- for example:

# Space Needs at the Three Schools

#### **DAVIS**

- Davis Minimal: 2 classrooms to replace modular, 1 kindergarten (10), 1 music room, 1 (SAIL an existing room expanded), 1 additional (first or second grade) (plus café expansion, drop off/pickup reconfiguration, OT, office, conference and storage)
- Davis Prudent: 2 classrooms to replace modular, 1 kindergarten (10), 1 music room, 1 (SAIL an existing room expanded), 1 additional (first or second grade) plus 1 additional (10, 10, 10) plus 1 art/music room (plus café expansion, drop off/pickup reconfiguration, OT, office, conference and storage)

#### **JGMS**

- **JGMS 4.5 rooms-** 1.5 SAIL/OT, 1 Art/Health, 1 FL, 1 Teachers, Solve Orchestra through FTE and keep Learning Strategies in LGI solving the orchestra/learning strategies space conflict by adding staff
- **JGMS 6.5-** 1.5 SAIL/OT, 1 Art/Health, 1 FL, 1 Teachers, 2 Learning Strategies (Orchestra/Band/LGI)-solving the orchestra/learning strategies space conflict by adding rooms

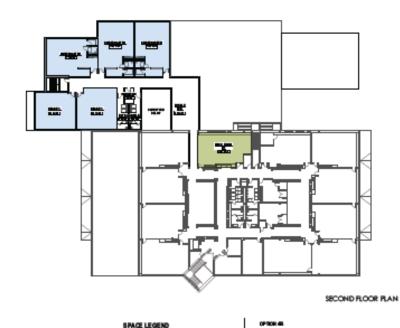

#### BHS

- BHS Minimal- 1.5 SAIL, 1 Famco, .5 LC, .5 ELL, .5 Offices
- BHS Optimal- 1.5 SAIL, 1 Famco, .5 LC, .5 ELL, .5 Offices, plus 1 Transitions/Life Skills, plus 1 large Dir Study for Subs

#### Davis Option 4B and Conceptual 3-School Scenario

- Move Integrated Pre-school from BHS to Davis
- Implement option 4B: Phased 11 classroom addition/renovation (\$12,265,000)
- Add Davis roof project originally slated for 2015, then moved to 2018 and again to 2024 to the Davis Project (\$1,200,000)
- Begin planning for expected 4.5-5 room addition at JGMS (\$3,700,000), and 4 room renovation of BHS D wing (\$1,300,000)
- Move timeline for JGMS and BHS from 2022 (JGMS) and 2024 (BHS) to 2019, with feasibility studies funded in 2018 and construction begun in 2019.

To recap, then, the 4B Davis option includes:

1 kindergarten classroom

2 classrooms to replace the modular

classrooms

1 first grade classroom (margin of error)

1 second grade classroom (margin of error)

1 combined art/music room

1 music room (internal)

Adult bathrooms

**Expanded Cafeteria** 

Modified parking/drop-off and

pick-up

Offices/conference rooms

Expanded OT/PT

4 Integrated Pre-school rooms

#### Have we applied to the MSBA for state funding assistance?

We have applied for two years in a row to the Massachusetts School Building Authority for state funding assistance and we have been denied each time. With approximately 15 projects being selected from 100 plus applications, many of them whole school projects in queue for 10 years, it is highly unlikely that we will receive state funding assistance.

# How do enrollment numbers and program needs compare to 20 years ago when the new Davis School was built?

| Year | Davis | Kindergarte | # Classes | Average | Use Diffferences               |
|------|-------|-------------|-----------|---------|--------------------------------|
|      |       | n           |           |         |                                |
| 1999 | 486   | 150         | 8         | 18.75   | CASE in small room             |
| 2017 | 597   | 197         | 8 + 1     | 22.63   | CASE in large room, SAIL, ELL, |

|      |       |             | m         |         |                                |

# Will the cost of construction eliminate the fiscal savings derived from the creation and expansion of in-house special education programs?

 Keeping in mind that serving students in the least restrictive environment is the primary motivation, and fiscal savings the secondary motivation, the answer is absolutely not.

With annual projected tuition cost savings/avoidance, ranging from \$6,400,000 in 2017 to \$8,400,000 by 2028, measured against program costs running from \$3.1 million in 2017 to \$5.4 million in 2028, we are netting a \$3,000,000 annual savings/cost avoidance. The \$30,000,000 cost savings/avoidance over only 10 years alone far exceeds the cost of the entire projects, let alone the space that is specifically required for special education.

#### What is the plan for the modular classrooms?

- We have secured a transitional three month lease to allow us to learn whether the project will be proceeding (STM approval of the construction documents)
- If it will proceed, we will move to a two year lease at \$1100 per month, and then pay the \$27,000 originally planned for to have the company dismantle them.
- If the project is not supported this year, we will have to purchase them at \$54,000 and \$10,000 for eventual dismantling. They will not meet code to be used as classrooms in a new project, but could be used for temporary office space.

#### What are the staffing implications associated with the project?

|                      | Professional Staff        | Support Staff              |
|----------------------|---------------------------|----------------------------|
| September, 2019      | Likely 1 special educator | .8 to 1.0 EA               |
| Beyond 2019 Moderate | 1 classroom teacher       | TA's based upon            |
| Growth               |                           | individual student special |
|                      |                           | education needs $(0-2)$    |
| Beyond 2019 Major    | 2 classroom teachers      | TA's based upon            |
| Growth               | .25 part-time art         | individual student special |
|                      | .25 part-time music       | education needs (0 – 3)    |
|                      | Possibly 1 special ed     |                            |
|                      | Possibly .5-1.0 ELL       |                            |

Nursing staff, recently increased to address medical fragility needs,. Should be sufficient (plus CASE nurse)

(Italics indicate needs based upon individual students rather than numbers)

#### Can we postpone this project? No.

 This year, we have two Kindergtn, four 1<sup>st</sup> Grade, and five 2<sup>nd</sup> Grade classrooms with 23 students.

| GRADE | GUIDELINE | MAX |
|-------|-----------|-----|
| K     | 18        | 20  |
| 1     | 20        | 22  |
| 2     | 20        | 22  |

- The two first grade classrooms in the modular spaces are overcrowded and necessitate using the hallway connector to enable certain instructional plans.
- Delays will lead to increased construction costs and further delays for BHS and JGMS.
- Strong recommendation of Building Committee and School Committee

| SEPTEMBER | SEPTEMBER 5, 2017 |    |    |    |    |    |    |    |    |   |     |  |  |

Should we do the Davis School roof as part of the Davis School Building Project?

Yes, we recommend doing so.

Are we confident that we can meet the prescribed deadlines for STM & ATM?

- Absolutely.
- Lane School example.
- Lane had tighter timeline.
- Our strong working relationship with TBA, its excellent track record.
- Mr. Alani's proven planning

What Figure Will Be Put Forward for Construction Documents at STM?

• \$990,000
